COLLOIDS AND SURFACES A

Subject Index

Active carbons, 203
Adsolubilization of 2-naphthol, 161
Adsorption, 193, 203
Adsorption of gemini surfactant, 161
Aggregation number, 1
Air/water interface, 263
Alkylammonium chloride, 121
Amino acids, 127
Amorphous aluminosilicate, 75
Antifoaming, 187
Antifoams, 257

Binary ionic–nonionic surfactants, 141
Bond strength, 115

Capillarity, 257
Catanionic surfactant, 121
Cation exchange, 75
Cationic gemini surfactants, 41
Characterisation, 89
Colloidal silica particles, 89
Critical aggregation concentration, 1
Critical micelle concentration, 41
Critical phenomena, 257

Depletion, 107
Dispersion stability, 161, 221
Double layer, 75
Dynamic light scattering, 89

Electrophoresis, 75
Emulsion inversion, 245
Equilibrium penetration, 63

Ferric ions, 51
Film thickness, 221
Fluorescence, 1
Fluorescence probe, 1
Foams, 187, 257
Fractal surfaces, 193

Gas adsorption, 257

Haematite, 97
Hall's thermodynamic treatment, 63
Heteroaggregation, 97
Heterogeneous surfaces, 247
Horvath–Kawazoe method, 203
Hydrophobically-modified polymers, 1

Immobilized layers, 247
Ion adsorption, 75
Irreversible adsorption, 193

Kraft lignin, 115

Liquid chromatography, 127

Magic-angle spinning, 171
Marangoni flow, 257
Micelle, 1
Microgels, 211
Microporosity, 203
Microviscosity, 161
Miscibility gap, 257
Mixed liquid crystals, 121
Mixed monolayer, 63
Monolayer, 193
Multilayer, 193

Natural waters, 97
Near-surface, 263
NMR spectroscopy, 171

Oil solubilisation capacity, 41
Optical properties, 167
Ostwald, 245
Oxides, 97

Particle deposition, 115
Particle detachment, 115
Particle image velocimetry, 263

Particles aggregation, 97
Particulates, 51
Phase diagrams, 257
Phospholipids, 63
Physical absorption, 193
Polyelectrolyte, 1
Polyethylene oxide, 115
Polymer–surfactant interaction, 1
Poly(oxyethylene)–poly(oxypropylene) copolymer, 63
Porous glasses, 149
Porous structure, 149
Pragmatic theory, 107
Profoams, 187
Proteins, 1
Pyrite formation, 51

Salt effect, 161
Selenium hydrosol rods, 167
Silica, 97, 127, 161
Silicon carbide, 171
Site energy distribution, 193
Sodium alkyl sulfate, 121
Solution composition effects, 51
Solution polymerization, 211
Spatial encoding, 247
Stability mechanism, 221
Stagnation point flow, 115
Stokes' Law, 245
Structural charge, 75
Sulfide ions, 51
Surface activity, 187
Surface charge, 75
Surface energy, 247
Surface free energy, 149
Surface heterogeneity, 149
Surface properties, 41
Surface tension, 187, 257
Surfactant adsorption, 63
Surfactant concentration, 221
Surfactant mixtures, 121
Suspensions, 107

Thermodynamic parameters, 127
Thermodynamic treatment of penetration, 63
Turbidity spectra, 167

Urethane stepgrowth, 211

Vapors, 193
Viscoelasticity, 263
Viscosity, 89
Vortex ring, 263

W/O microemulsions, 141
Wettability, 247
Wetting, 257
Wetting hysteresis, 247

Yield stress, 107
